July 23, 2015

Dear Parent,

We are organizing a wellness program for our children. Cancer has been predicted as one of the deadliest disease of the future. A scientific survey run by the Ministry of the Human Resource Department, New Delhi, has predicted that in the year 2050, sixty percent of our population will be affected by this deadly disease. The main reason for the spread of this disease could be lack of healthy living habits and drastic changes in the food habits.

We are working with MHRD and Cancer Aid Society, a pioneering institute on cancer research, to bring awareness to our future generation, on good healthy habits, good food habits and personal hygiene. As an effort to create healthy citizens of future, Ms. Reena Saha, Regional Director, Cancer Aid Society is been invited to conduct an awareness program for all our children on 27 July 2015.

We would post the excerpts on the website for the benefit of parents. We believe that this program will create awareness in our children and help them to live in a cancer free nation.

Regards,  
Principal,  
Primrose Schools.
