10th Annual Day Celebration

We are celebrating our 10th Annual Day Celebrations; indeed it is a very happy moment for all of us. It's a milestone in the history of Primrose Schools. Ten great years of achievement. An achievement we can be proud of. An achievement which has helped our children to enjoy education. A great success for our unique teaching methodology which puts children's happiness first and helps them to experience the joy of learning. We have proved that there is no need to pressure cook our children in the name of education. Our children are flowering beautifully as what they are, what they can be, what they enjoy the most without hate, without fear and they are getting ready to face the world with confidence in the sunlit path forever.

The annual report which I am going to take you through is just a glimpse of joy that they enjoyed at school. It would probably take a year for me to showcase the entire journey, but we have gathered here not only for listening to my annual report but to enjoy the scintillating performance of our children.

Orienting parents is a very important activity which enables the parent to understand our teaching methodology. We will all be a very successful parent if we do not judge our children, or compare them with others. The secret lies in understanding that our children are unique in this world and they need to be respected for that. This mind set is important for the parents to enjoy their children education.
